I am 100% against funding of any kind for this project. The project was ill advised from the beginning, and is a complete waste of my tax dollars. As a state we need to look at our fiscal position, and the services that we are cutting to try and get to a balanced budget.

Education, Mental Health, Veterans Assistance, Road Repairs, Real long Term Job Creation, and Stabilizing our infrastructure are all issues that need our attention long before we even consider helping to fund this "boat anchor" project.

To the supporters of this project, this is unconscionable, and needs to be dropped before it can even get to a floor vote.
