We are in enough trouble with what we MUST provide to the citizens of Connecticut. Paying good money for a entertainment venue is not acceptable when we are laying off state employees, our hospitals are not receiving the help that is necessary and countless number of unsupported requirements that the state mandates to our cities and towns. This is a waste of money and I can not support this, nor the team itself. I am in Bristol and the City of Bristol has the college league and it is a great time in a historic stadium that is NOT being supported by funding of millions of dollars from the state. This should not be approved.
