Another example of the gross incompetence in Hartford. When money is tight, in a household, school or government, we must spend our dollars on our needs, ex: food ,clothing, shelter, medical. We everyday people don't have the luxury of continually opening new credit cards or loans to purchase baseball fields, historic water wheels or new toilets that aren't needed. I believe our governor and politicians are quite delusional, have no common sense, ex: spending a fortune keeping UConn hospital running in the red. Why? If it isn't cost efficient, close it, stop pissing away our money, raising our taxes, fees and permits=all taxes. The reason we're in debt is that this governor and the politicians have no clue how to manage a needs based budget, they live in the pie in the sky. Psychotics build castles in the sky, (neurotics live in them) while the psychiatrists collect the rent. Who is who?
