sports is the majority's best way the young and the old are nurtured physically and mentally. It also helps spiritually as well. Sports will be with us forever, but the government should not be involved in funding the professional ranks of sports. Parents and the government should help, secure and provide for everyone up to adolescent. This is what we call Minors.

The Majors are a pursuit for those that have pass the age of support. This stage of sports is a choice not a necessity. We can do without the Majors. The pursuit of happiness is not something that should be paid for by the tax pays dollars.

I am oppose to having my money used for human pleasure that doesn't add life saving support to those that participate in it. Please kill this Bill or it will become the mother of other slippery slopes.
