Because the State is in financial distress I am opposed to the passage of Bill 452 for the benefit of the Yard Goats. However, there is one exception I would consider and that is if the State will end fluoridation of our water and take the total amount of money all the water companies pay to fluoridate for one or two years and have that amount go toward the stadium! And if you don't know what that figure is, it's about time you found out!
