I am mortified and sternly object to my tax dollars funding a nonsensical baseball team and stadium. It's time you bullies in the legislature understand we are in a financial mess the governor and Democrats created. GE is moving out, residents are leaving in drives. The well is dry.

I am a retired public school teacher, I didn't build my pension up with frivolous overtime. I worked at my position 40.5 years, 5.5 more than normal. Had to go back to public school teaching part time because this state is so expensive. So...start doing the job we elected you to do!
