

Please support SJ 36 To Protect public lands with agricultural conservation and recreational value:

As someone who co-chaired the 2005 committee to write the Town of Ashford's Plan of Conservation and Development I know the need to have areas in town that we can count on as being there for the long future. Linkage to those conserved protected lands adds to wildlife corridors, trail systems, greenways, forest management and agricultural areas. It is difficult to ask landowners to add parts of their backlands to the linked areas of protected lands without the knowledge that the state forest lands in Ashford will be there in the future. Please support SJ 36.

Sincerely,
Ruth Cutler
Ashford CT.
