I am NOT in favor of HB5597. Domestic Violence victims need the safety of the court system behind them when seeking protection from armed abusers, who may very well kill them and their children and God knows who else with their guns. These monsters do not have the right to own a fire arm when they have restraining orders against them. As a victim of domestic violence myself, many years ago, I know what these women and their families and friends go through during such horrible times. Trying to leave the abuser is difficult and the court system needs to step in immediately before yet another gun death occurs!

Thanks.
