

Dear Sir/Madam:

I want to see mandatory GMO labeling on ALL products which contain even trace amounts of GMOs in CT and other states. I have both health and environmental concerns as to it's safety, as do many other countries in the world which now are banning GMOs. I don't understand why, if GMOs are supposed to be safe, companies want to hide it from the public. As a CT resident, I want to see this labeling law passed.

My regards,

Brigitte Frank
