To whom it may concern,

My family and I are very concerned about GMO's NOT being labeled in the state of Connecticut. As a consumer, I want to know what I am buying for my family to eat. NOT have the labeling is a big step in the wrong direction. Consumers / general public have the right to know what they are buying.

In the same way that Kosher / Halal / Gluten free / nut free foods are labeled for consumer information. GMO free or GMO foods need to be labeled appropriately so the consumer can make a informed decision on what to buy.

**I am all for retailer's to sell GMO products, just consumers need to be aware of what they are buying.**

A very concerned citizen of Connecticut

John Lowenstine
