

To whom it may concern, we are writing in regards to:

AN ACT CONCERNING THE USE OF GENETICALLY MODIFIED ORGANISMS IN CHILDREN'S FOOD.

To require infant formula, baby food and children's foods that are produced partially or entirely with genetically engineered materials to be labelled as such.

Our youngest daughter is 10-years-old and last year she was diagnosed with Hashimoto's hypothyroiditis, and autoimmune disease. Part of her treatment plan is to pay close attention to her diet and know the source and ingredients of the foods she is eating. It is very important to us to know whether the food we buy for our daughter and our whole family contains genetically modified organisms. I urge you therefore, to support labeling of GMO foods as such, so that people like us can easily tell which foods are GM and which are not.

Thank you very much!

Raluca Mocanu and Edward Wazer
