

Mark Tweedie
Faulty Foundations

I have been a resident of the Lydall Woods Condo Development in Manchester since 1986 when they were built. So far I have spent close to \$20,000 of my own money to repair my foundation.

We had a meeting on February 9 of our homeowners and were told nothing can be done to recoup any of this money. Many other homeowners in our development have also had to fix their foundations.

This could affect many of us who won't be able to sell our homes because of all the media publicity being reported about this problem.

We were told the only fix was to replace our foundations and then sue our insurance company which refuses to take any responsibility but keeps collecting our money for coverage of our units.

I am retired and this is my home and the biggest investment of my life and I would hope that someone in the town or state would try to help us solve this problem.

I cannot attend tomorrows hearing but I hope that this email is included in the hearing.

Sincerely,

Jacqueline Gribbon
