Opiate bill 353

The licensed acupuncturists in Ct worry about broader scope and site availability for ear acupuncture. It is considered to be part of acupuncture practice and needs the minimum standards set by the acupuncture license due to being an invasive modality. Safety of patient is protected by minimum standards set by license.

Ear acupuncture practitioners need to get the acupuncture license.
It is an Invasive therapy and part of acupuncture scope.

Thank you

Ingri Boe-Wiegaard , L. Ac.
