Subject: Fwd: East Windsor is NOT a good choice for a State police gun range and training facility

East Windsor is NOT a good choice for a State police gun range and training facility

The proposed location for the gun range is residential area. The Broad Brook School is within one and a half miles. I want the students to count their math facts not the gun fire reports. The proposed site is too close to the school period. The state should consider locations that farther away from educational establishments. This GUN range is TOO close to the school and the state should be sensitive to children and guns. I feel this is a mistake and will fight to have out children for a safe environment.

Thank you
