**Subject:** NO to Willington as possible State Police gun range site

Hello,

I live on the Tolland/Willington town line. It is hard for me to believe the State Police gun range is even a possibility in our community. My husband and I work very hard to be able to have our family live "off the beaten path" in a rural and peaceful surrounding. Why would the state want to take that away from us when there are facilities already available that would just need updating? I wish I was a clever writer and I could put into words how devastating a gun range would be for us.... noise, property values, environment.....

I support our State Police but not the Willington gun range site. It would destroy, what is most important to us, in our community.

Thanks,  
Kristine Schmitz
