

Seriously? Another way to confiscate the money of hard working individuals? For years, you've been figuratively nickel and diming us. You now want to take that to a literal interpretation. This bill needs to be stopped now. And how stupid is the logic in the final statement of the bill: "To replace the redemption fee on bottles with a recycling fee, similar to the state of Delaware, and have such bottles recycled through curbside recycling rather than redemption centers and use the funds from such recycling fee to, in part, fund the reuse of such bottles in the state."

I already pay nearly \$100 per month to have my items recycled from my house. So now you want to charge me when I buy the items and then again when I have them taken away. Nice. Do the people who introduce these bills have any clue in life?

If you want to do us all a favor, just repeal the damn five-cent deposit and let me recycle them at the curb like I do everything else. THAT's how you make a difference. Not by common thievery.
