Testimony for HB6329 An Act Concerning Hydraulic Fracturing in CT

To Chairmen Senator Kennedy, Senator Miner, Representative Demicco and members of the Environment Committee,

Please protect our environment here in Connecticut from radioactive and chemical contamination in fracking waste. The DEEP should not be writing regulations to import this waste into Connecticut! I ask that you support a permanent ban in the state of Connecticut to prevent mishandling of fracking waste from tarnishing our precious environment. Thank you.

Sincerely,

Thomas Binder MD
