Re: HB 6329 AN ACT CONCERNING HYDRAULIC FRACTURING WASTE IN CT

I am in FULL support of removing DEEP from authority to submit regulations and instead place a PERMANENT STATEWIDE BAN on hydraulic fracturing waste, in any form in the state of CT immediately. I also support a permanent ban on all fracking oil and gas waste.

Several CT towns have already passed town ordinances to prevent any of this waste from entering their town. Thousands of CT residents have signed petitions to make these ordinances official. I ask you to look to the movement in CT and to view these ordinances that have passed, as proof, that CT residents WANT our elected officials to speak for us NOW because we have been speaking and we do not want DEEP to make any regulations.....WE WANT A PERMANENT BAN.

Public health should be the only priority to pass this HB 6329. I am asking you to approve and pass HB 6329 to protect citizen health, including your own health as the risks to human health are high.

Thank you for your time. This is what the residents of CT want.
