

To the Environment Committee:

My name is Ellen Castaldini and I am a citizen of South Windsor, CT. The purpose of this email is to document my support for HB6329. I want the state of Connecticut to take action to permanently prohibit the disposal, treatment, storage, handling, de-icing applications and other uses of fracking waste and by-products anywhere in Connecticut. Like our neighboring state of Vermont, we need to take final steps to protect all 169 of our Connecticut towns and cities.

Thank you,

Ellen Castaldini
