HB 6329 AN ACT CONCERNING HYRAULIC FRACTURING WASTE IN
CONNECTICUT

Cathy Cementina
904 Flanders Road, Coventry, CT 06238

Testimony: I am in full support of HB 6329 and I encourage you to pass this bill.

Already, since the *temporary* moratorium on fracking waste began, ten municipalities in Connecticut have passed their own ordinances against the import and distribution of fracking waste in their communities. We need a state wide ban to ensure that ALL Connecticut towns are protected against the potential spilling or spreading of the toxic chemicals that have been confirmed to be present in leftover fracking waste. The three hazardous waste plants in CT that would be processing this incoming waste have all been non compliant within this past three years, so regulations alone will not ensure that incoming waste will be clarified before it gets used for such things as de-icing or landfill in OUR communities.

We care out the our waterways, our ground soil, and our public health. Please pass HB 6329.

Thank you,
Cathy Cementina 860-742-1205
