

Testimony from Noel Cherubino, 114 Town Street, East Haddam CT, 06423

I fully support H.B. 6329. I believe this Act is in the best interest of all current and future residents of the state of Connecticut. I hope that our neighboring states follow our example and enact similar legislation. These practices have been proven to contaminate ground water. We will be dependent on other states and corporations for water if our supply is contaminated. Any financial gain will be short-lived, and our state will be rendered unliveable without fresh water.
