

To The Committee,

I am a 32 year resident of Hampton, CT, and I want to go on record in support of HB 6329. I do not want the burden and risk off hydraulically fracked waste being transported into and stored anywhere in our state at any time in the future. This waste has been shown to be toxic and of no benefit to the health or safety of the citizens of our state. We cannot afford to let down our guard on environmental health and safety, especially in this time of unprecedented federal DE-regulation under the new administration which is intent on de-regulating as many environmental laws as they can. Our state does not need to bear the burden of fracked waste from other states. Transportation accidents are a very serious threat anywhere along the route to the storage facility.
