

Dear People;

We already have far too much toxic waste in our state. The very last thing we need is to add more. Our State should take action to permanently prohibit the disposal, treatment, storage, handling, de-icing applications, and any other uses of toxic fracking waste and by-products anywhere in Connecticut.

HB 6329 should be passed right away, to this end. It is the right thing to do.

Sincerely yours,

Noreen P. Cullen
