

Dear Committee Members:

I would like you to know that I support HB 6329 and hope that this bill makes it to the floor of both chambers this session for a vote (in favor). I cannot think of a more deplorable idea than to have hydraulic fracturing waste stored in our state. We are a small state and every community is affected by such decisions as environmental waste. Please support this bill and make sure it passes on through the legislative process. Thank you.
