

Testimony for HB6329 An Act Concerning Hydraulic Fracturing in CT

To Chairman Senator Kennedy, Senator Miner, Representative Demicco and members of the Environmental Committee,

Please protect the safety and health of Connecticut residents. Bringing fracking waste into our state puts our state at risk for radioactive and chemical contamination. The clean up of spills will be costly to the citizens of the state of Connecticut. DEEP should not be writing regulations to import this waste into CT. We must have a permanent ban to protect accidents, spills, leaks and inadequate testing and treatment from happening.

Sincerely,
Christine Louden
