

To: Senators Kennedy and Miner and Representative Demicco, Environment Committee

Subject: HB6329 An Act Concerning Hydraulic Fracturing in Ct.

As a mother and grandmother, I ask you to support HB6329. Connecticut needs a permanent ban on fracking waste, which contains extremely harmful carcinogens and can cause radium and other natural contaminants to surface.

Replacing the DEEP's regulation of imported waste, a permanent ban would help protect property values, the environment and, most importantly, the health of our children and grandchildren.

Thank you.

Denise E. Lynch
