

To Chairmen Senator Kennedy, Senator Miner, Representative Demicco and members of the Environment Committee

Testimony for HB6329 An Act Concerning Hydraulic Fracturing in CT

Please protect our property values, our town budgets from costly remediation expenses and our state from radioactive and chemical contamination in fracking waste. DEEP should not be writing regulations to import this waste into CT. We must have a permanent ban to prevent accidents, spills, leaks, inadequate testing and treatment from happening.

Rev. Dr. Molly O'Neill Loudon
