

Dear Members of the Environmental Committee,

My name is James Root and I live in Danbury. I support HB 6329 A PERMANENT STATEWIDE BAN ON FRACKING WASTE.

I really don't want these rolling toxic bombs rolling down nearby I84 24/7. To process this waste instate is a deceptively costly and nearsighted idea for either state or involved municipalities. There are many health and environmental liabilities attached to dealing with these new and exotic chemicals in the fracking waste. To eschew this ban would be irresponsible of the the committee and the state.

Additionally, we would subsidizing the fracking energy industry that is making the CT ratepayer pay more for heat and power and is also making the energy less independent.

I hope you will advance HB 6329.

Best,

James Root
