

Recently I became aware that the moratorium for accepting fracking waste In CT will expire in July 2017. Many towns are passing their own ordinances to prevent fracking waste from being put in their landfills, open spaces and dry wells in their towns. Fracking waste is a hazard to our aquifer, our drinking water and to our soil. It is full of salt and radioactive materials. There is , like nuclear waste , no safe way to dispose of fracking waste and the contaminated water that is the result of fracking. We must protect our property values, our drinking water and aquifer for our children and grandchildren by opposing the acceptance of fracking waste . Please pass bill HB6329 to protect our state and residents.
