

HB 6329 **AN ACT CONCERNING HYDRAULIC FRACTURING WASTE IN CONNECTICUT**

We are requesting that you work hard to represent the needs and well-being of your constituents in regard to bringing any fracked waste to our state for processing. We are equally concerned that bringing fracked waste and moving it through our state is equally threatening to our environment and the public health of our people. We request that you work on the side of integrity and not on the side of big business. This is not the kind of revenue building that we support nor that the state should endorse.

Respectfully,

Marge and David Schneider

92 Whispering Pines Road

Avon, CT 06001
