

Testimony for HB6329 An Act Concerning Hydraulic Fracturing in CT

To Chairmen Senator Kennedy, Senator Miner, Representative Demicco and members of the Environmental Committee,

Please ensure protection for all areas of our state from the dangers and costly cleanup expense from radioactive and chemical contamination of fracking waste. The entire state should be banning the waste and the residents within each town should not need to force bans town by town. DEEP and the EPA should not be writing regulations on importation and transporting these materials. Connecticut needs a permanent ban to prevent fracking waste from coming into the state.

Thank you for your consideration,

Nancy Scott
