

Testimony HB 6329 **AN ACT CONCERNING HYDRAULIC FRACTURING WASTE IN CONNECTICUT**

We must ban hydraulic fracturing waste and all oil and gas drilling and extractions waste.

I have been teaching chemistry and organic chemistry for over 30 years, and I have followed the research on materials we have invented industrially. Fracking waste is a mixture of known and undisclosed man-made materials, many that have already been identified as toxic to living things. We don't need fracked fuels, and the resulting fracking waste is disaster for the future of our children and our planet.

Please be sure to pass laws that will prevent hydraulic fracturing waste from entering our state; we need to be the example here.

If we are smart, we will soon be off of fossil fuels with the help of legislators that are forward thinking and care for our state. Thank you.
