

HB 6329

Anne Walker
51 Pigeon Hill Road
Windsor, CT

We recently passed an ordinance to ban fracking waste in Windsor, CT. There are six Other towns that have passed ordinances and many towns working on such ordinances, as we speak.

We support HB 6329 and want CT residents to decide our fate NOT DEEP.
This is a serious health issue that can not be contained, it is our DUTY as responsible citizens to permanently ban any and all hydraulic gas, oil and fracking waste products from entering our state. This is a human rights issue and deserves respect and swift passage of this bill into law.

We fully support HB 6329 and applaud the state representatives that introduced this bill!
