

March 11, 2017

Chairs: Sen. Ted Kennedy, Jr., Sen. Craig Miner, Rep Mike Demicco

I am Cynthia Willauer, and I serve in ministry for the Care of Creation with the First Congregational Church of Old Lyme

I urge passage of this bill as there should be no market whatsoever for hydraulic fracturing waste in Connecticut.

Let's get on with making Connecticut "greener" and the people of Connecticut more likely to benefit from healthy environs rather than letting fracking waste into our State.

I come from Pennsylvania, much of which has been devastated by the fracking industries, and I sorrow deeply for communities and families from once lovely regions of the State I grew up in. In urging support of this bill, I urge Connecticut be wise. There is no health in the process of fracturing gas or in disposing of fracking waste.

Thank you, sincerely,,

Cynthia C Willauer, Lyme, CT. 06371 ccwil@conncoll.edu
