

I would like to see Connecticut go forward rapidly with increasing our reliance on renewable energy sources and moving away from our reliance on fossil fuels. Therefore:

Please support SB 630, to strengthen and extend Connecticut's Renewable Portfolio Standard (RPS), which requires utilities to get a gradually-increasing percentage of energy from renewable sources, beyond 2020.

Please oppose SB 106, which would undercut our rapidly growing solar and wind industries by potentially allowing nuclear power to co-opt their incentives.
