

S.B. 106

Madam Chair/Mr. Chairaman:

I support S.B. 106 because I believe we need to have as many clean energy options as possible and this bill will allow clean energy companies to start selling their energy to the energy grid. As climate change accelerates, we need to do everything in our power to reduce emissions and transition to a clean energy economy as soon as possible. I believe this bill helps to achieve that.

Thank you,

Brian Gay
