

Dear Energy and Technology Committee members,

As a resident of Hamden with strong interest in Connecticut's rapid transition away from the use of fossil fuels, I would like to express my opinions of SB 630 and SB 601:

I support SB 630 to strengthen and extend Connecticut's Renewable Portfolio Standard (RPS), which requires utilities to get a gradually-increasing percentage of energy from renewable sources, beyond 2020.

I oppose SB 106, which would undercut our rapidly growing solar and wind industries by potentially allowing nuclear power to co-opt their incentives.

Thank you,
Laura Hayes
Hamden, CT
