

Dear Energy and Technology Committee members,

Please support **SB 630**, to strengthen and extend Connecticut's Renewable Portfolio Standard (RPS), which requires utilities to get a gradually-increasing percentage of energy from renewable sources, beyond 2020.

Please oppose **SB 106**, which would undercut our rapidly growing solar and wind industries by potentially allowing nuclear power to co-opt their incentives.

It's critical to the health of Connecticut's residents and economy that you strengthen requirements for more renewables.
