Hello,

I'm writing to express my support for this bill. While I am much more supportive of renewable energies, I see how nuclear is the cleanest bridge we have to a renewable future. I'm very happy with the recent decisions happening at the state level with regards to renewable energy - and hope Millstone can continue to provide good jobs and energy for us while we transition. I appreciate my Senator, Paul Formica, for proposing this bill and urge you to approve it in committee so the full state legislature can consider it.

Thank you,
Jason Morris
