

Dear CT Energy & Technology Committee,

I have been using the renewable option from UI for as long as it has been available.

But this just buys credits from other states where clean energy is produced. We need to make the change to do it here ourselves, for the sake of both CT's economy and the health of our next generation.

Please support SB 630, to strengthen and extend Connecticut's Renewable Portfolio Standard (RPS), which requires utilities to get a gradually-increasing percentage of energy from renewable sources, beyond 2020.

Please oppose SB 106, which would undercut our rapidly growing solar and wind industries by potentially allowing nuclear power to co-opt their incentives.

Thank you,

Marion Sachdeva, New Haven
