

Please support SB 630, to strengthen and extend Connecticut's Renewable Portfolio Standard (RPS), which requires utilities to get a gradually-increasing percentage of energy from renewable sources, beyond 2020.

Please oppose SB 106, which would undercut our rapidly growing solar and wind industries by potentially allowing nuclear power to co-opt their incentives.

Nothing is more important than addressing Climate Change. Fossil fuels have been subsidized for years. It is long past time to switch to renewable energy. It will take longer than 3 years. Do the right thing for your children and grandchildren. Act now.

Thanks,

Jim Worth
