

Please support renewables in CT by voting for SB630 and NO to SB106. I want to be completely free of fossil-fuel dependency and ask you to support renewable energy now, for our climate, our health and our future. Please stop expansion of natural gas pipelines, and set up a solar-farm option in our state like those in neighboring states, so we can have 100% renewable within the next few years. I'm Jan van Heurck of 32 Arbor Lane, Madison CT 06443
