

I could not be happier that bill #5587 will be up for approval. Seniors cannot afford any more taken out of their Social Security benefits and then on top of that have it taxed as income. Really, this has been a hardship for me. Every year, I think; I can't believe that this is from where our State has chosen to raise money. It is just so wrong! For most of us it seems like we need a Robin Hood to save us from not being able to afford our taxes, medications, food, etc. Please pass this bill. The wrong people are being taxed.
