

To Whom it May Concern:

Currently, we in Connecticut are bystanders in the most important election in the land, that of President, because one voter does not necessarily equal one vote.

I am writing to ask you to support the national popular vote proposal (**S9/HB5434**). This is not only fairer than the current system, but it would encourage candidates to present their views to CT voters through rallies in this states. This would action-ize the participation of our voters and equalize the impact of our votes with those in states that currently carry more weight.

Sincerely

Frank Marrone
