

Dear Representatives,

I write to urge you to support and pass the National Popular Vote (H.B. 5434) and allow Connecticut to join the 11 other states that have done so already.

The National Popular Vote will increase the interaction between Presidential candidates and the general public in ALL States, not just those in so-called swing States. This move will encourage more people to become engaged in the political process because everyone will know that their vote really counts.

I support this passage as a registered Independent because I believe it is an critical change that will improve our political process. I look forward to hearing about the progress of this bill and its eventual passage.

Thank you,

J. Evan Ward
Quaker Hill, CT
