

Dear Ladies and Gentlemen:

Please oppose HB6926, CT does not need any more costs involved in doing business in our state. We are already one of the most heavily penalized states in the country if not the most. Do the sensible thing and scrap this proposal.

Please oppose HB5159, As a group property owners see the need for some companion animals, the lack of definition of what this means and abuse of the opportunity to have companion animals, has caused hazards for property owners, many types of animals are not domestic or dangerous, their are excessive amounts of animals now in multi family properties that disturb the well being of neighbors. Please make an effort to clearly define and restrict companion pets to make it more a more sensible situation. Dr's must actually prescribe their clients need a pet and there have to be limits.

thank you,

Adam Bonoff
