

Representative Staneski & Senator Slossberg,

I am emailing in regards to the possible elimination of local health departments and the plan for consolidation into regional health districts.

As a resident of Milford, I firmly believe that eliminating our local health departments will be detrimental to individual cities as well as our state as a whole. This plan will not effectively address public local health challenges efficiently and with high quality. I stand in opposition of Bill #7170 and in overwhelming support of Bill #5757AA prohibiting the consolidation of municipal health authorities.

Thank you for your time,

Lindsay Darling-Doyle
