

Dear Members of the Public Health Committee,

My name is James Root. I support HB 7221 AN ACT
CONCERNING ACCESS TO WATER PLANNING INFORMATION.

Clearly it is possible to keep the public in the loop on critical aspects of our water system, while, at the same time, creating no security liabilities. Recent trends in the water industry necessitate this change in the statutes.

A lot of research was put into this bill. I hope you will advance it as a responsible public health measure.

Best,

James Root
