

3/6/2017

I am nearly 69 years old and I have a 35 year-old intellectually disabled daughter who has been on the DDS residential waiting list for nearly 11 years. I am in support of SB 246 because it will provide accurate, regularly updated information via census. This would provide transparency with critical information for the public, for legislators and for DDS. I appreciate your attention to improving our basic data system regarding residential waiting lists via annual census, and ask that you support it, too.

As guardian of my 35 year old I.D. daughter I am responsible for all of her DSS and DDS paperwork. This paperwork tends to be confusing, redundant, often conflicting, and definitely overwhelming. I believe a significant amount of time, paper and money could be saved by streamlining this paperwork. Since my daughter's intellectual disability will not improve, that aspect of redetermination paperwork is redundant, irrelevant and cumbersome. Thus, I am in support of HB 5808 and ask you to support it, as well.

As parent of a daughter on the DDS residential waiting list for more than ten years I am here to express my support of SB 244 which addresses improvement of services for Intellectually Disabled persons. As guardian of my 35 year old daughter and my 62 year old I.D. brother I consider this to be invaluable in planning for them. This bill would help us with identification and quantification of a variety of individual needs which we have as a state. Once again, data and transparency would be an improvement in planning and with the prioritization of needs and goals. Please support SB 244.
