**Subject:** Say no to tolls

Greetings:

Take a ride on the CT highways and you will find a significant amount of traffic from out of state cars! They ride for free in CT, yet CT residents pay to use all neighboring state roads. This is ridiculous as out of state vehicles contribute to destroying our bridges and roads but don't contribute to maintain them! Has anyone investigated the installation of toll scanners and camera's to capture out of state vehicles and charge them accordingly. The technology is available to do this as other states have installed unmanned tolls that perform this function! You need to either charge out of state vehicles to use CT roads, or install tolls and drop the gas tax so CT residents have a benefit!
